OVERVIEW

The wing mount, or top tree, holds the top wing and sets its angle and height, making it the anchor for the largest aero device on the car. Adjustment range here is how a team dials in downforce for the track. Multiple adjustment holes let you change angle without fabricating parts, and included sliders make the change quick.

Mount rigidity is what keeps the wing at the angle you set under full load.

Wing Mount, Aero, Top Wing Tree, 16 Tall, 26 Inch Wide, Sliders Included, Chromoly, Black Powdercoat, Ti22 Sprint Car, Kit.
