Wing Mount

Aero · Top Wing Tree · 16 in Tall · 26 in Wide · Pins / Sliders · Titanium · Natural · Ti22 Sprint Car

PART NUMBER
TIP6005
View on PriceGuidePro ›

OVERVIEW

The wing mount, or top tree, holds the top wing and sets its angle and height, making it the anchor for the largest aero device on the car. Adjustment range here is how a team dials in downforce for the track. Multiple adjustment holes let you change angle without fabricating parts, and included sliders make the change quick.

Mount rigidity is what keeps the wing at the angle you set under full load.

Engineered to place the wing at the optimum angle for wedge-style sprint chassis, the Aero Wing Tree is constructed from durable 4130 steel and black powder finished. The X design adds strength, while 3/4 Inch holes provide up to 3 Inch of adjustment. Adjuster pins must be purchased separately.

SPECIFICATIONS

Material	**Titanium**
Finish	**Natural**
Style	**Aero**
Product Width	**26 Inch**
Product Height	**16 Inch**
Fits Application	**Ti22 Sprint Car**
Sold As	**Kit**
