Wing Post Slider

Titanium · Natural · Top Tree · Sprint Car

PART NUMBER
TIP6012
View on PriceGuidePro ›

OVERVIEW

Wing post sliders let you change wing height and angle without unbolting and refabricating parts, turning an aero adjustment into a quick between-heats change. Being able to move the wing quickly is how teams chase a changing track. Machined designs resist binding so the adjustment still works when covered in mud.

Sliders take load constantly, making a spare worth keeping.

Ti22's Wing Tree is designed to be a lightweight addition. With an extra inch added to the length, the tree is able to achieve the wing angles needed for a variety of wings. Both titanium and chromoly versions are offered.

The Wing Tree inserts are fabricated with 1/4 Inch offset to accommodate varying tab dimensions. The tree comes with bottom inserts for easy wing adjustment.

SPECIFICATIONS

Material	**Titanium**
Finish	**Natural**
Vehicle Type	**Sprint Car**
Sold As	**Each**

SHIPPING & PACKAGING

Package	**10.9 × 4.15 × 1.1 in**
