OVERVIEW

Top wing pins secure the wing to the tree and are what you pull to change wing angle, making them one of the most frequently handled parts on the car. A pin that seizes or bends turns a quick adjustment into a wrestling match. Quick pin designs release cleanly even when covered in mud.

Pins are small, easily lost, and cheap, so most teams keep extras.

Top Wing Pin Kit. 7/8 Inch Long x 1/4 Inch O.D., titanium.
