Wing Cylinder Stud

5/16-24 in Thread · 1.650 in Long · Titanium · Natural

PART NUMBER
TIP6118
View on PriceGuidePro ›

OVERVIEW

Wing cylinder studs anchor the adjuster cylinder at its mounting points, carrying wing load through the adjustment mechanism. A failed stud lets the wing move freely, which changes the aero balance instantly. Correct thread and length are what let the stud hold.

These are inspected whenever the wing system is serviced.

Engineered to place the wing at the optimum angle for wedge-style sprint chassis, the Aero Wing Tree is constructed from durable 4130 steel and black powder finished. The X design adds strength, while 3/4 Inch holes provide up to 3 Inch of adjustment. Adjuster pins must be purchased separately.

SPECIFICATIONS

Material	**Titanium**
Finish	**Natural**
Thread	**5/16-24**
Product Length	**1.650 Inch**
Sold As	**Each**

SHIPPING & PACKAGING

Package	**4.1 × 2.35 × 0.7 in**
Ship Weight	**0.04 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
