Wing Post

Front · Bent · 12 in Long · 1 in OD · Aluminum · Black Powder Coat · Sprint Car

PART NUMBER
TIP6123
View on PriceGuidePro ›

OVERVIEW

Wing posts carry all the downforce the wing generates and feed it into the chassis, working under constant load while taking whatever debris gets past the rock screen. A bent post changes wing angle mid-race and quietly costs you bite. Correct length and offset put the wing where the setup intends, and a rigid post keeps it there.

Posts are a known damage item in contact, so most teams keep replacements ready.

Forward-Bent Nose Wing Posts are available in natural or black anodized aluminum, or black or chrome-plated 4130 chromoly steel. Secured in the nose wing post clamps that mount to the torsion tube pinch clamps to support the center of the nose wing. 12 Inch long, 1 Inch O.D. tubing.

Sold individually.
