Wing Post

Aero · Passenger Side · Nose · Torsion Tube Mount · Chromoly · Black Powder Coat · Ti22 Wing Post Clamp · Sprint Car

PART NUMBER

TIP6134

[View on PriceGuidePro >](#)

OVERVIEW

Wing posts carry all the downforce the wing generates and feed it into the chassis, working under constant load while taking whatever debris gets past the rock screen. A bent post changes wing angle mid-race and quietly costs you bite. Correct length and offset put the wing where the setup intends, and a rigid post keeps it there.

Posts are a known damage item in contact, so most teams keep replacements ready.

Aero Style Aluminum Nose Wing Front Post Clamps (for clamping nose wing post to the torsion tubes). Clamps securely to torsion tubes. Has aero-style I.D. for nose wing front post.

Bolts included. Angled perfectly to reach side panel of nose wing with posts. For use with our Aero Style Right and Left Nose Wing Posts.

Sold individually.
