Wing Strap

Nose · Flat · 11.5 in Long · Belly Mount · Stainless · Natural · Sprint Car

PART NUMBER
TIP6156
View on PriceGuidePro ›

OVERVIEW

Wing straps tie the wing side boards to the chassis and carry the load the wing generates without disturbing airflow. A strap that bends or fails lets the wing move, changing the aero balance the car was set up around. Adjustable versions let you change wing height without fabricating new parts.

Straps are light, cheap, and take damage in contact, so spares are worth having.

The Adjustable Nose Wing Posts provide the flexibility to set your wing as needed without having to switch or rebend your current posts. The adjuster provides for an extra 3/4 Inch of adjustment. Adjustment bracket points toward front of car.

Sold individually.
