Quick Turn Fastener

Oval Head · Slotted · 7/16 x 0.500 in Body · Aluminum · Natural

PART NUMBER
TIP8100
View on PriceGuidePro ›

OVERVIEW

Quick turn fasteners are what let a crew pull a body panel in seconds instead of chasing a dozen bolts with a wrench. On a race night, that difference decides whether a damaged panel gets replaced between heats or the car sits. These oval head buttons use a slotted drive and a 7/16 x 0.500 Inch aluminum body, keeping panel weight down while holding secure through vibration.

Sold in a 10-pack because these are consumables that walk off and bend in a crash.

Oval-Head Quick-Turn Buttons, 0.500 Inch Long. 10 Pk. Slot head.
