Quick Turn Fastener

Oval Head · Slotted · 7/16 x 0.500 in Body · Aluminum · Black Anodized

PART NUMBER
TIP8102-50
View on PriceGuidePro ›

OVERVIEW

Quick turn fasteners are what let a crew pull a body panel in seconds instead of chasing bolts with a wrench. On a race night that difference decides whether a damaged panel gets swapped between heats or the car sits out. These hold secure through the vibration and flex a sprint car generates, then release with a quarter turn.

They are consumables that bend in contact and disappear in the pits, so buying in packs is the norm.

Oval-Head Quick-Turn Buttons, Black, 0.500 Inch Long. 50 Pk. Slot head.
