Tapered Spacer

1/2 in ID · 1/4 in Thick · Steel · Zinc Oxide · Universal

PART NUMBER
TIP8210
View on PriceGuidePro ›

OVERVIEW

Tapered spacers position wheels and rotors on the axle while spreading load across the mounting face rather than a single edge. Correct spacing protects the bearing shoulder and keeps track width where you set it. Anodized aluminum resists seizing so the spacer comes off as easily as it went on.

Carrying several widths lets you adjust spacing without ordering new parts.

Spacers are made from steel or aluminum and have many uses including spacing rod ends on linkages to prevent binding or provide clearance. Packages of 2.

SPECIFICATIONS

Material	**Steel**
Finish	**Zinc Oxide**
Color	**Silver**
Thickness	**1/4 Inch**
Inside Diameter	**1/2 Inch**
Vehicle Type	**Universal**
Sold As	**Pair**

SHIPPING & PACKAGING

Package	**4.05 × 2.4 × 0.45 in**
Ship Weight	**0.07 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
