Rod End

Spherical · 1/2 in Bore · 5/8-18 in Left Hand Male Thread · Aluminum Ball · Aluminum · Black Anodized

PART NUMBER
TIP8253-10
View on PriceGuidePro >

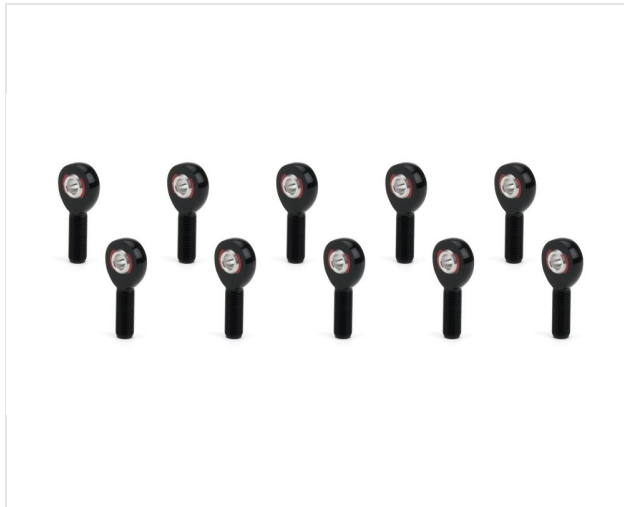

OVERVIEW

Rod ends are the pivot at every end of every suspension and steering link, which makes them the most numerous wear point on the car. A worn rod end introduces slop that shows up as vague steering and inconsistent bite. Nylon-insert designs hold tolerance longer than bare metal-on-metal under the constant reversals a dirt car sees.

These are consumables, so most teams replace them on a schedule rather than waiting for failure.

Spherical rod end, left hand male thread. 5/8-18 Inch thread, 1/2 Inch bore. Aluminum housing with aluminum spherical ball and Nylafiber Matrix race.

Black anodized. Unlined, jam nut not included. Set of 10.
