# Tie Down Strap Kit

Rubber · 15 / 21 / 31 in Long

PART NUMBER
**TIP8512**
View on PriceGuidePro ›

## OVERVIEW

Tie down straps secure the car in the trailer, and a strap that fails lets an expensive race car move at highway speed. Rubber straps absorb road shock rather than transmitting it to the chassis. A kit with mixed lengths covers the different anchor points a car needs.

Straps degrade with UV and use, so periodic replacement is sensible.

6-Piece Rubber Tie-Down Strap Kit. Includes (2) 15 Inch, (2) 21 Inch, and (2) 31 Inch straps.
